

# Building a weather website

Bilal Kuanysh

Yntalbekova Arailym

“

Our site will show the weather through the index. We can write the index of the city through the index, the site will show us the weather of this city.

-How did you distribute tasks among team members?

- Kuanysh basically wrote the code
- Arailym found information and made a presentation

-What new things did you learn while developing the project?

- A lot of things how to make a correct and beautiful site to do, teamwork, 10 weeks we did different tasks and it all helped us to make a site

# -What difficulties did you face while creating the project?

- The main difficulty is the time we had little time and we did not have time to add a lot of things to the site and for some time the site did not work as we wanted, but we solved this problem

# -What experience did you get while doing project work?

- It was a great experience for us, we learned a lot and made a website in python. Not only now when we did the project, before the project we learned a lot for us it was a cool and interesting programming language.
